

Suheda Sener

FULL-STACK DEVELOPER

• [Portfolio](#) • [LinkedIn](#) • +358 40 3641 855 • sener.suheda@hotmail.com • Oulu, FI 90570

Motivated IT student specializing in full-stack development, with experience in real-time applications and simulation systems. Passionate about problem-solving, system performance, and testing, and always eager to learn and explore new technologies.

EDUCATION

Bachelor of Engineering in Information Technologies

August 2023 - Present

Oulu University of Applied Sciences

- Participated in a short-term Erasmus+ mobility project at Eindhoven University of Applied Sciences (Hogeschool Eindhoven), focusing on a Mobile Development project
- GPA: 4.96/5

EXPERIENCE

Full-stack Developer Intern

October 2025 - Present

ZIMBA OY (Startup)

- Contributing to full-stack development of mobile applications using React Native. Working with modern technologies and frameworks to build scalable solutions as part of a development team.

SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, Kotlin
- **Frontend:** React, React Native, Next.js, HTML5, CSS, Figma
- **Backend & Databases:** Node.js, Spring Boot, Express, SQL, PostgreSQL, MySQL, API design, integration and testing, Postman
- **Tools & Cloud:** Git, Wireshark, Azure, Render, Cloudflare, Linux, Puppeteer, CI/CD pipeline, AutoCAD
- **Methodologies:** Agile, Scrum

PROJECTS

HELIOS - Telemetry Monitoring & Simulation System

 [GitHub](#)

Qtathon 2025 Finalist

- Real-time spacesuit telemetry system with safety alerts and a built-in simulator generating realistic sensor and emergency scenarios for testing. Built with Python, PySide6/Qt, and MQTT.

X-ITOS

 [GitHub](#)

Mobile Application Project, 2025

- An integrated escape room system featuring a tablet check-in app, hardware simulation, and social mobile app. Built using React Native, TypeScript, Firebase, Nest.js, PostgreSQL, and Docker.

NordFlix Movie App

 [GitHub](#)

Advanced Web Application Project, 2024

- A full-stack app for browsing movies and TV shows, allowing users to review both movies and TV shows, save favorites, and share them. Built using React, JS, Node.js, PostgreSQL, Azure and Supabase.
